1. SITUATION

Who are we? What has happened?

On Wednesday the 24th of February the Chinese Navy started the invasion of the Taiwan. Reports from other islands that have been overtook by the Chinese, is that all Taiwanese civilians are arrested and send to rehabilitation camps. Some rapports indicate mass murders happening if the population does not cooperate.

A few Taiwanese solders stationed at the Base on the island of Seliu have moved into the island to try to stop the Chinese troops still operating.

The UN could not intervene due to Vetoing by Vladimir Putin. President Biden has indicated his that the USA will fully support the Taiwanese troops flighting of the Chinese invasion.

The Chinese Navy has sent beach landing craft and 2 troop ships to the Island of Monyet. Here they have unloaded Heavy equipment, seen by the intelligence satellites.

During the last encounter the Chinese learned that using heat Seeking AA systems only, the US planes are vulnerable, it's likely that they keep this approach.

2. MISSION

What are we going to do about it?

You will fight side by side with the remaining Taiwanese forces to protect and free the civilians. Due to language problems, they will focus on the civilians while the US Marines will counter the Chinese assets. The Taiwanese army only has older model M113's and a few CM32 APC' supported by infantry, they do not have the option to engage the Chinese heavy weapon systems.

Primary Mission: Find and secure the prisoner camp, provide security for the Taiwanese Army
Secondary mission: Airfield and 2 beachheads created by the Chinese.
