

MISSION BRIEFING

LAST RESORT GAMING

Operation:	Operation Sea Angel
Episode:	1 / 2
Location:	Chinese Sea
Date:	24th Feb 2021
Time:	03:00AM
Password:	BadChinaman

1. SITUATION

Who are we? What has happened?

During the yearly RIMPAC exercise the US and many allied Navies and Marine forces are heavily involved in the biggest international warfare exercise.

During this exercise the Chinese Military took their chance to seize the Paracel Island of which they claimed is Chinese territory.

These Islands were controlled by Taiwan. All contact with Taiwanese troops is lost.

We received an emergency transmission from a SF team that was training on the island. They got overwhelmed by the Chinese invasion and are currently hiding in the dense forest

US President Biden has ordered the US Amphibian assault group led by USS Tarawa to set course to the island group.

2. MISSION

What are we going to do about it?

Mission Critical:

Your priority mission is to find and rescue the SF team present on the island. During their last radio they indicated the intend to move to the south west of the island and hide.

They keep radio silence. Its agreed that they will use a visual indicator on their position if they think it is safe to do so. (Red Flare)

Secondary mission is to find the Long-Range Anti-ship missile system and disable it

Additional Priority:

Retake control of the Guran Airfield to prevent fast build-up of troops on the island of Pulau Guran

3. RESOURCES

What equipment do we have?

2x MK V SOC BOAT	1x CH-53E Super Stallion
1x LCU-1610 Landing Craft	2x UH-1Y Venom
4x AAVP Variants	2x UH-1Y MEDIVAC
1x M1A1FEB	4x MV22-B Osprey
4x LAV25A1 Variants	4x AV-8B Harrier II Plus
2x M1030 Recon Bikes	1x M977A4 AMMO
1x HMMWV Ambulance	1x M977A4 FUEL

4. LIMITATIONS

What can't we do?

Try to prevent damage to all infrastructure (People still need to live there)

Minimize damage to all military structures so the Taiwanese Army can re-use it.

Do not harm civilians

If you find captured Taiwanese troops, assist them in any means possible.

US SF Training Team (5 Pax)

The Dong-Feng M20 is a long-range supersonic anti-ship / surface to surface missile system (Location Unknown)

Known Chinese Assets

Dongfeng EQ2050 (Multiple variants)
HMMWV Copy with worse specs

SX2190 7.5ton 6x6 special heavy-duty truck

HQ-7 short-range air defense missile reverse engineered from the French Crotale
Max operating range: 8.6 km
Guidance: Command + electro-optical tracking
Warhead: HE-FRAG with proximity fuse
Radar detecting range: 18.4 km
Radar homing range: 17 km

HQ-61 'Red Banner-61' Chinese SARH guided surface-to-air missile (SAM)
Max operating range: 10 km
Guidance: Radar tracking
Warhead: HE-FRAG with proximity fuse
Radar detecting range: 12.9 km
Radar homing range: 10 km

HJ-8
second-generation tube-launched, optically tracked, wire-guided anti-tank missile

Mounted QJZ-89 HMG

Shaanxi KJ-200 Moth system
Airborne early warning and control (AEW&C)

Changhe Z-18
medium-lift transport helicopter

Xi'an JH-7 also known as the FBC-1
(Fighter/Bomber China-1)

Chengdu J-10
single-engine, lightweight multirole fighter

Type 054A frigate (Jiangkai II class)
Multi-barrel AA systems

Houbei class missile boat (Type 22 missile boat)
