1. SITUATION

Who are we? What has happened?

We are the LRG Special Weapons DEA taskforce deployed in the northern delta of Colombia. The river delta has always been a poor part of the country. But due to the additional economic crisis caused by the Corona pandemic people are really suffering. The Colombian government is known to be corrupt and the trust is an all-time low.

The AUC (Autodefensas Unidas de Colombia) has been winning support from the locals in the woodland area's where the local government struggles to reach and support these people. The AUC is known to use to use the manufacturing and shipping of drugs for their income. They now use part of this money to provide aid for the communities in the woodland area.

Word has spread that the DEA taskforce has little care for civilian casualties. The Leader of the ELN has indicated this will not be tolerated. The senseless killing must stop. Also, this might cause civilians to pick up weapons and fight back.
