1. SITUATION

Who are we? What has happened?

While BAF was withdrawing from the Indonesian Island of Tembelan, the Russian Federation launched a full-on assault on the island. Only one major BAF installation in the South-West has survived the initial onslaught and is now scrambling to evacuate all remaining equipment and personnel to the nearby fleet before planning a counterattack.

2. MISSION

What are we going to do about it?

The Last Resort is tasked with securing the retreat by slowing down the enemy's approach long enough. We are to do this by establishing defenses covering the MSR running through the town of Tersebar.

Enemy Forces **must not pass** the line indicated on the map until the last transport has left the base.

3. RESOURCES

What equipment do we have?

2x Land Rover WMIK HMG FFR	1x Land Rover WMIK Milan FFR
1x FV510 Warrior Cage/Net	1x MAN HX60 4x4 Repair

4. LIMITATIONS

What can't we do?

Our only way is forward, retreating to the main base before it has been fully evacuated is considered defection and will be punished by court martial.
