1. SITUATION

Who are we? What has happened?

August 1987

In July 87, A law permitting the formation of other political parties (according to certain provisions) was introduced. Multiple groups of Mujahedeen have gathered to form a movement called (القاعدة) "The Foundation" to revolt against that law.

Their goal is to fight as a guerrilla to bleed out the USSRs logistic lines throughout the Afghan land to regain it. They have also shown great threat to the US agents on ground, calling them (جنگ برنجر) "WarBringers" and blaming them for sustaining the Afghan war for their own Benefit, even though no real proof has been shown to the UN.

The KGB and the CIA decided on an agreement of cease fire over the area of ████████ for operation Loan Shark. The goal will be to neutralize the local enemy forces patrol outpost, and destroy the USSR equipment that has been stolen by those Guerilla Fighters.
